# Dear Parents

LEGO Company is a company with very strong beliefs and values, built over generations. We cherish the idea of children having fun, learning and interacting through creative and stimulating play. We strive to bring this idea to life in everything we do – in every product and experience we offer to girls and boys of all ages.

## **Our fundamental beliefs:**

Children are our role models. They are curious, creative and imaginative. They embrace discovery and wonder. And they are natural learners. These are precious qualities that should be nurtured and stimulated throughout life.

Lifelong creativity, imagination and learning are stimulated by playful activities that encourage hands-on and minds-on creation, fun, togetherness and the sharing of ideas.

People who are curious, creative and imaginative – who have a childlike urge to learn – are best equipped to thrive in a challenging world and be the builders of our common future.

## **Our mission:**

To nurture the child in each of us. We'll do this as the world leader in providing quality products and experiences that stimulate creativity, imagination, fun and learning.

# Discover, explore and experience the entire LEGO® world!

All LEGO products are designed to nurture the child in each of us – imagination and creativity are stimulated and cultivated in infants, pre-schoolers, and teenagers alike. In fact [www.LEGO.com](http://www.LEGO.com) has something for every member of the family: there are links for children, parents, experienced builders, and adult enthusiasts. Just click to link up to your kind of fun!

During their first 2 years children have to learn more than they do the rest of their lives.

Hands-on  
and minds-on  
creation, fun,  
togetherness and learning  
are all stimulated by  
quality playtime.

Role play helps children  
learn how to express  
themselves.

Just imagine an  
8 year-old being able  
to create a real movie ...

There are  
lots of ways to  
encourage young  
minds to  
explore the  
mysteries  
of the  
universe!

Challenge your child's creative and interactive skills as early as possible.

Play is the best means of working towards an understanding of conceptual relationships.

The imagination is a wonderful, never-ending source of stories.

Toys that bring in a computerised element help nurture vital creative skills.

For kids of all ages!

How about building oversized models with the new LEGO sculptures?

Over 80 cm tall!

"Just press the worm  
to start the music!"

# Waking up to new possibilities every day

Your new baby experiences a remarkable world of sights, sounds and sensations. Cuddles, warm colours, stimulating sounds, and soothing music make up the perfect welcome home. For the first month or so, your baby won't be able to do much more than passively take in the new surroundings. But curiosity and an innate desire to play quickly take the upper hand as the months go by and this brave new world just begs to be explored!

**LEGO® PLAY MATERIALS GROW WITH YOUR BABY**  
Our designers create play materials with your baby's growing and changing developmental needs in mind. The LEGO Baby items you purchase for your new baby become even more valuable with time – features become useful in the ensuing months as your baby becomes more capable and agile, more curious and imaginative, and more of an adventurous individual.

"Includes fun rattle that sits on the worm's head"

Simply press the worm to start the music. As they grow, babies have great fun rocking and rolling the apple across the floor and placing the funny green rattle on the worm's head. Later, the funny way the apple moves and the music it plays will combine to encourage your child's first movements.  
2503 Musical Apple  
From birth

"rattle"

Your new baby will love gazing at the friendly faces and warm colours. Later, there's the fun of testing itchy gums on the smooth pieces, and shaking them to hear the rattling noises. Ideal for the cot, car and pram.  
2514 Activity Friends  
From birth

Pull back  
and release

Watch them wobble as they scoot across the floor. Start by simply rolling the bug backwards and then releasing it towards your baby. Eventually, their fascination with action and reaction will have children setting it off without your help!  
2524 My Racing Bugs  
From 6 months

# First actions lead to happy reactions

From about 6 months your child's desire and capacity for fun grows day-by-day. Babies quickly gain control over their hands and bodies and start to explore the world around them. So now's the time to start introducing new play materials! Some should be pure fun; others should provide ways for babies to start exploring stacking games – though don't be surprised if they spend most of the time putting the blocks in their mouths!

Firstly, the elements are fun to chew on, and then, as co-ordination improves, babies explore putting the pieces together, making the vehicle roll, and rocking the seesaw. Simple, first play activities that build confidence.

## YOU CAN RELAX WITH LEGO® PRODUCTS

All our play materials are made of the finest, most durable materials and designed with your baby's safety in mind. There are no small bits that can become detached. Smooth corners and textures make them excellent teething devices as well as toys. And they last for generations!

# Confidence is build through small successes

As the months pass, your baby starts to grow. The baby becomes more attentive, and starts to make 'sing-song' sounds. Soon small towers are built and proudly presented to attentive parents – and then knocked down again, of course! Get ready for a whole new world of play!

## IT'S GOOD TO TALK

Your descriptions of what your baby is seeing, feeling, hearing and smelling constitute the foundations for language skills that will develop and mature. LEGO® play materials give you plenty to talk about: characters, textures, colours, shapes, movements, and situations.

"I knew I could do it!"

It turns from a convenient place to store the LEGO elements and building plate that come with it into a handy support when your baby develops the urge to stand and walk. Stable design that won't tip over. 2010 Toddler Truck From 9 months

# Free expression brings creativity

DUPLO Basic is an adaptation of the classic LEGO® building brick for smaller hands, bringing toddlers all the fun and learning that are part of creative play. This is true 'hands-on, minds-on' play in which young minds are free to express their own ideas, using colours and shapes in infinite combinations. To you, it looks like a brick. To an active and creative toddler, it's a house, a mountain, a horse, a car – you name it!

The ideal foundation for every toddler's wildest dreams.  
2304 Building Plate  
From 1 1/2 year

A variety of shapes and colours toddlers can use to create a world of their own.  
2242 Brick Time  
From 18 months

## EASY PUT-TOGETHER, TAKE-APART FUN

Toddlers as young as 18 months find DUPLO Basic bricks an ideal way to practice their fine motor skills (picking up a brick, clicking it into place). As they grow and start to play with other children, DUPLO bricks prove to be an excellent vehicle for children to learn how to play together.

Turn to pages 44-45  
for more information.

## Fun for the whole family at LEGOLAND

LEGOLAND® is the place where families can share fun activities. There's something for everyone, including DUPLO® Land, a special section devoted to fun, hands-on activities just for toddlers and their parents. There's a DUPLO® Land for you and your toddler to enjoy at our family parks in California, Denmark, England and soon – Germany!

## Acting out life in a kid's size world

Youngsters respond well to real-life situations that form the basis for story making and role-play –this is how they start to make sense of the real world. So we've taken all the benefits of the well-known DUPLO 'put-together, take-apart elements' and added some play-provoking themes. The result is a series of new worlds for your children to learn about and play in, full of familiar characters, elements, and new creative possibilities.

A full cast for big farm stories: the farmer and his family plus all the familiar farmyard animals. A big stage for action: the farmhouse, the garden, the big tree, and lots of fencing. Share time together naming the animals and then leave your child to hours of imaginative role-play and pretending!  
**2699 Farm Yard and Friends**

## Picture book included!

A complete world of wildlife excitement. Pure fun for young children and a valuable way to help them come to grips with new aspects of the real world. Comes with an entertaining and educational picture-only playbook.  
**3095 Wildlife Park**  
 From 3 years

Imagine the fun your toddler can have pretending to be an action hero!  
**3083 Flying Action**  
 From 2 years

## LAUNCH PADS FOR CREATIVE PLAY

Themes such as 'the wildlife park' and 'on the farm' provide a context in which children can act out specific roles and situations. This valuable form of play enhances verbal and social skills – especially when you play along with your child, asking questions and introducing concepts such as co-operation, empathy, and looking after animals.

The perfect place for acting out home and family experiences.  
**2942 Playhouse**

## Big stories for big imaginations

Toddlers grow up fast and it's important to make sure their play materials keep up with them. Play situations with lots of story value are the basis of these DUPLO play themes, which are especially good for youngsters who are ready to play with other children.

### IT'S ONLY A GAME

It's tough for a toddler to 'lose' a game, but it's an important and character-building experience nonetheless. Our 'Race Action' play theme presents a simple competition – you can use it to help your child understand that 'You can't win all the time'.

A simple pushbutton sends each car racing down the track as the TV camera records the action.

**3085 Race Action**  
From 3 years

It's fun to learn how gardens grow! This set introduces your child to a world where people work hard to grow vegetables, flowers and trees.

But it's not such hard work when the pet cat wants to play! Includes play mat, wheelbarrow, greenhouse, picture playbook and more.

**3088 Growing Garden**  
From 2 years

## Play books included!

Children love picture books and they especially love it when their parents look at books with them. They are also a great catalyst for activating the younger members of the family! That's why LEGO® Company has created picture-only playbooks to accompany both our 'Race Action' and 'Growing Garden' play themes.

The 'Race Action' playbook uses pictures to explain the concept of competition, shows how the catapult works, and provides ideas on how to make more interesting races. The pictures in 'Growing Garden' introduce the idea of seasons and how they affect both people and plants.

# The endless possibilities of make believe

When your child starts pretending to be someone else – whether it's a police officer, a farmer or a princess – it is a first step towards seeing life from a perspective other than the child's own. This helps children explore and experiment with new aspects of their personalities and helps them learn how to accommodate the wishes of other people.

## Managing more fun

Your toddler will love the idea of a train that goes around and around on its own. At first you will have to help put the tracks together, but before you know it children are building tracks all by themselves! They'll love learning how to control the movement of the train along different tracks and acting out all the different roles of people who make the railways work.

"Bet I can build a cooler track than you!"

**A CLASSIC LEGO® DUPLO FAVOURITE**  
For generations, parents have insisted on buying LEGO DUPLO trains for their children. That's because our trains combine many learning opportunities: the construction of the tracks and the station elements, the cause and effect of different switches, and playing the roles of everyone involved in the railway. LEGO DUPLO trains are also built to last – even through hours of tough treatment!

## DUPLO DOLLS – for small hands

With DUPLO Dolls, LEGO® Company brings youngsters a doll with fantastic accessories designed specifically for 2-6 year-olds. Perfect for children as young as 2, each DUPLO Doll is the right size to be held and cuddled, and comes with clothes and other play elements that even small hands can handle easily. Young children enjoy playing with dolls because it's fun to act out the love and care they get from their parents. Which DUPLO Doll will your child learn to love?

### LEGO COMPANY KEEPS IT SIMPLE

In the past, parents have had to invest in far more sophisticated dolls, many of which also embody social messages (such as fashion) that many parents consider inappropriate for young children. You'll find LEGO DUPLO Dolls have a charming innocence about them that will help keep children happily occupied with play themes appropriate to their age.

# MyBot

## Tons of fun!

LEGO® MyBot reacts not only to how your child chooses to construct the model, but also how it is manoeuvred. The result: tons of fun playing with up to 25 different combinations, 40 display pictures, and 26 different sounds that magically change and react to how LEGO MyBot moves.

Your child uses a special screwdriver to build LEGO MyBot, choosing from 3 'identity' Smart Bricks to make the model light up and make sounds like a plane, racing car or robot. The fun is doubled by adding one of the 3 'function' Smart Bricks.

# YOU START the action

# Join the tough race

The year is 2210 AD. We're in the city of Knossox on the planet of Xalax, where everyone is wild about Racers – a zany motor race that's run every day in a giant arena they call the Big Dome. Fearless drivers push their super-design cars to the limit and beyond!

You and your friends can enjoy the wildest races once you get your hands on these tough little racers. So far there are 8 different LEGO® Racers to choose between – each crazier than the one before.

The idea is to crash into each other and send opposing drivers flying – or to make the quickest getaway – or be the first across the finishing line – or the snappiest at stunts!

**Lightor**

The fastest of them all. Nobody can beat him once he reaches top speed!

## KNIGHTS' KINGDOM

# EVIL ROBBERS ATTACK THE GREAT CASTLE!

READY TO FIGHT  
FOR KING LEO?

Imagine you are in the Middle Ages, trained as a knight to draw your sword against any enemy! This applies especially to Cedric the Bull and his mean mob of henchmen who are armed to the teeth and always trying to get the better of good King Leo and steal his huge treasure or kidnap the Princess!!

Fortunately, the King has built himself an almost impregnable castle with thick walls, lots of towers, and secret traps that can outsmart his enemies. But Cedric still plans day and night to take the castle. He has invented some incredible siege engines so King Leo shouldn't feel too safe: when it comes to besieging castles, Cedric's an expert!

He's so strong he can chop wood with his bare hands!!!

Be bold,  
my King!

No villain  
shall enter the  
castle!!

Cedric - you horrible  
vermin. I dare you to  
fight man-to-man!!!

Fire at will,  
men!

I'll blast  
them to  
smithereens!!!

## MORE GAMES FOR YOU SET IN THE MIDDLE AGES!

With LEGO Creator Knights' Kingdom you are in charge of building a fantastic virtual 3D medieval kingdom!

On the CD-ROM about the Knights' Kingdom there are even more battles to fight, plenty of adventure to embark upon and perils to face - and lots of different castles and fortresses for you to build!

Or go to [www.LEGO.com/castle](http://www.LEGO.com/castle) and secretly explore the splendid knightly countryside! Listen to the swish of swords and the clatter of hooves - right in the thick of things!

What will  
landing on  
Mars be like?  
The journey  
is a couple of  
hundred million  
kilometres and  
it'll take us  
6 or 7 months!

But  
don't  
worry  
- we're  
already  
there!

Brrrrr ...  
did you  
know that  
the temperature  
here goes right down to -133  
Celsius? And there are gusts of wind  
of up to 220 kph?

That 3 billion years  
ago there were  
rivers and lakes?  
OKAY - but did you  
also know that water  
has recently been found  
on Mars? And that  
water means life?!

Are you on the Mars Mission?  
If so, find your seat in Captain  
Doc's Solar Explorer - he will  
get us there safe and sound!  
Captain Doc worked closely  
with the scientists to develop  
this fantastic spaceship that  
will transport us to Mars so  
we can really see if there is life

**Do you think you'll be able to keep up when Anakin Skywalker revs up his engines?**

The great Boonta Eve Podrace is the most incredible challenge you can imagine. But it's also the most dangerous! Only the toughest survive its 3 lightning-fast circuits across the bone-shattering terrain. But what about Anakin? Is he quick enough to go up against the pro pilots? Let's hope no harm comes to his home-made Podracer — or his prospects could look very bleak indeed!

**NEW**

# READY FOR THE GRAND PODRACE?

SIX HEROES  
ONE DESTINY

# WICILE

We are on the island of Mata Nui.

The evil Makuta rules and times are dark.

A legend says that 6 heroes will come to restore peace.

One day 6 canisters drift ashore containing 6 mighty figures.

The legendary Toa have arrived on Mata Nui.

But to defeat Makuta the Toa must find the Great Masks of Power.

The Toa set out in search of the masks.

Many dangers await them before they can fulfil their destiny and free the island.

## The island of Mata Nui

On Mata Nui there are canyons, deserts, caves, lakes, mountains, a volcano – and dangerous beasts. The Toa operate in different parts of the island, where they can best utilise their unique skills.

## The Six Mighty Toa

### ONU

The Toa of Earth.  
Has night vision and  
powerful hands for digging.

### GALI

The Toa of Water.  
Wise and agile and an  
expert in self-defence.

### LEWA

The Toa of Air. Controls  
the sky, the clouds and  
the wind.

### POHATU

The Toa of Stone.  
Can cause landslides  
and cascades.

### KOPAKA

The Toa of Ice.  
Controls the ice and  
can start avalanches.

### TAHU

The Toa of Fire.  
Master of the heat  
and able to surf on lava.

## The six Turaga priests

The islanders are called the Tohunga. Their priests, the Turaga, are the keepers of the legend. They share their knowledge with the Toa so they can find the masks and free the island.

Silver Champion is no ordinary racer: it took the LEGO® design studio over a year of brainstorming and planning before it was ready to go ahead with the project. The result was a technological wonder that looks like a real Formula 1 car down to the tiniest detail. Check out the suspension, for example – it's amazing! The only difference is that you don't have to actually fill the tank!

This fantastic full-scale model of Silver Champion was built with 249,172 LEGO elements. It's 5.25 metres long, 2.3 metres wide, and weighs 525 kilograms. It took 2,174 hours to build!

## SILVER CHAMPION

68.5 cm

### The pit

Enter the pit only when absolutely necessary. Usually you go in to change the tyres, the oil, or to let the mechanics adjust the engine.

### Pole position

Before each race all drivers test the racecourse. The fastest driver gets pole position, the second fastest starts as number 2, and so on.

See the Silver Champion in action! Formula 1's most amazing and realistic thunderer whizzes across the asphalt leaving the rest of the field trailing. It's 65 cm long and built like the real ones. You can transform it into a cool Silver Truck, too – and there is more building instructions and other cool stuff for you on the Internet!

**8458 Silver Champion.**  
From 11 years + Expert

### Starting rules

There are two sorts of starts for a Formula 1 race – a rolling start and a standing start. A rolling start is when your vehicle is already in motion in the starting area. A standing start is when your vehicle is stationary on the starting grid prior to the start.
