The power to create

Welcome to a world of fun and ideas, where we provide the fun and you the ideas! This catalogue is packed with new models and sets, all made to give you the power to create.

The power to create your own models. The power to create your own stories. The power to create your own action.

Let the fun begin!
Growing up, brick by brick

LEGO® Pre-school is all about fun and play value. The fact that young children learn many invaluable early skills in the process is of course something you can take for granted with LEGO products.

The versatile range makes it easy for you to find exactly the right toy for your children's different ages and needs:

- **LEGO BABY** for the youngest builders, 6-18 months;
- **LEGO DUPLO®** for the older builders, 2-5 years;
- New **LEGO QUATRO** for all young builders.

LEGO QUATRO is big news for small hands. These large, new, easy-to-handle building elements are eight times larger than the DUPLO brick providing hours of fun and success for adventurous toddlers.

Growing up is a long process. Products from LEGO Pre-school help make it a long, fun process: brick by brick.
LEGO® QUATRO: bigger, softer bricks for all young builders

Next

Ever dreamed of directing your own Hollywood blockbuster? Or leading a high-tech robot team on a top secret mission? Or maybe programming an intruder alarm to keep your little brother out of your room?

With LEGO® Next products, you can do all of these things... and a whole lot more!

LEGO Next puts the future at your fingertips with full motion digital video filmmaking, ‘smart’ robots that respond to your every command, challenging missions you can download through your computer and much more...

Because with LEGO Next, no mission is impossible!
CREATE ROBOTS YOU CAN BRING TO LIFE AND CONTROL

1. BUILD
To see your ideas come to life, combine the RCX microcomputer with over 700 LEGO elements, motors, touch sensors, and a light sensor. The RCX is a programmable microcomputer that acts as the brain of your robotic invention.

2. PROGRAM
Use your PC, the Robotic Invention System software, and the RCX to create programs that control your robot’s behaviour. The easy-to-use programming language contains “Big Block” commands such as “Forward” and “Turn Left” to get you up and running quickly. Additional features such as control editors, branches, and variables, allow for more advanced programming.

3. RUN
Activate your robot and watch it take on a life of its own!

Create robots that do what you want them to do. This new version of the Robotics Invention System introduces the next generation of robotics programming. The CD-ROM includes more than 25 exciting projects that let you build and program robotic inventions to perform tasks as varied as following a straight line, creating a burglar alarm, or drawing a picture. At the heart of your inventions is the RCX, a programmable microcomputer that reacts to its environment via touch sensors, light sensors and motors. Includes RCX microcomputer, CD-ROM with RCX Code and project ideas, USB Infra-red Transmitter, Constructopedia building guide, touch and light sensors, motors, gears and more than 700 LEGO elements. PC requirements: Windows 98/ME, Intel Pentium 233 MHz or higher processor, USB port, 32 MB of RAM.
