Stripped of their powers are the Toa spinning out of control?!

The Toa have yet to Fulfil their destiny. Returning to the city of Metru Nui, they have to rescue the hibernating Matoran left behind in the coliseum.

They thought they knew the streets of the city; they thought the rescue would be an easy task. But they were wrong...

Something has happened in Metru Nui: the sun has been blocked out by a thick green mist, and the city streets are enveloped in darkness – darkness made more frightening by strange, oozing webs criss-crossing the city as far as the eye can see. What has happened? What new menace must the Toa face?

Suspended between Good and Evil, you must decide whether you want to be a hero or a beast.

BIONICLE® – Spin your destiny!
In the new blockbuster DVD and video release, can the Toa Metru stop the powers of darkness taking control of the city for all eternity?!
The most formidable enemies, Vohtarak charge at their foes, and fire venom spinners from their lethal pincers – the poison paralysis instantly! 8742 Visorak Vohtarak From 7 years.

CREATE ROBOTS
 YOU CAN BRING TO LIFE AND CONTROL

1. BUILD
To see your ideas come to life, combine the RCX microcomputer with over 700 LEGO® elements, motors, touch sensors, and a light sensor. The RCX is a programmable microcomputer that acts as a brain of your robotic invention.

2. PROGRAM
Use your PC, the Robotic Invention System software, and the RCX to create programs that control your robot’s behaviour. The easy-to-use programming language contains “Big Block” commands such as “Forward” and “Turn Left” to get you up and running quickly. Additional features such as control editors, branches, and variables, allow for more advanced programming.

3. RUN
Activate your robot and watch it take on a life of its own!

Create robots that do what you want them to do. This new version of the Robotics Invention System introduces the next generation of robotics programming. The CD-ROM includes more than 25 exciting projects that let you build and program robotic inventions to perform tasks as varied as following a straight line, creating a burglar alarm, or drawing a picture. At the heart of your inventions is the RCX, a programmable microcomputer that reacts to its environment via touch sensors, light sensors and motors. Includes RCX microcomputer, CD-ROM with RCX Code and project ideas, USB Infra-red Transmitter, Constructopedia building guide, touch and light sensors, motors, gears and more than 700 LEGO elements. PC requirements: Windows 98/ME, Intel Pentium 233 MHz or higher processor, USB port, 32 MB of RAM.
