Learning the fun way. Brick by brick.

It's an old saying that you learn as long as you live. But when do you actually begin to learn?

Learning to us is a lot more than just school or kindergarten. The process begins the moment you are born since everything around you is completely new and unknown. You don't even know yourself or your abilities. Some day eventually, you will discover that you have both hands and feet - but then you have to learn how to use them. By reaching out, touching, experiencing and using all your senses. Naturally you don't think of this as learning, rather as playing.

Playing is fun and it is also vital for your development. Because only by

playing can you nourish all the talents you are born with. That's why it is so important that you play with toys that inspire your creativity.

Two 8-stud bricks can be combined in 24 ways, and 6 bricks in no less than 102,981,500. The bricks are an integral part of most of our toys but they are after all just bricks. It's what you can create with them that makes them truly fascinating.

All LEGO bricks (apart from electric elements) can be machine-washed at 40°C, and they are as new again. Just wrap the bricks in a piece of cloth to protect your washing-machine.

NOW LOOK!

I'M GOING TO TAKE ONE THING FROM EACH OF THE LEGO® SERIES IN THIS BROCHURE, AND PUT THEM TOGETHER AT THE END. SIMPLY TO PROVE THAT THEY FIT TOGETHER. NO, NO! DON'T CHEAT. READ THE BROCHURE FIRST ...

From **3** months.

DUPLO Toys are created for little hands and big enquiring eyes.

Playing is learning. And to a baby playing is essential since everything around is new. Even how to control those little hands!

DUPLO Baby toys are created with that in mind. Each one is made in appealing, bright colours, easy to hold, safe to put into the mouth, and with lots of sounds and functions to explore and investigate.

2015
Ball Rattle-Teether. Soft rounded forms. Ball rotates and rattles.

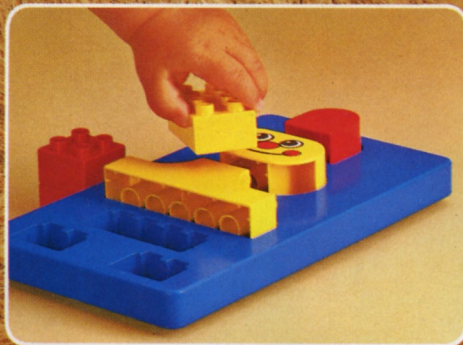

2023
Flower Rattle-Teether. Easy-to-grip form. Disc moves with click-clack sounds.

2024

From **2** years.

When your children's world starts to look like yours.

Now DUPLO pieces begin to look more and more like the things you see in real life. Simply because a child of just a few years is capable of recognizing things - and also recreating them.

Houses, cars, animals, people etc. All the fascinating things the child begins to discover in the "adult" world.

IT'S A FUN WAY
FOR LITTLE FINGERS
TO LEARN

2655

★ New 1985 - Available August.

From **2** years.

The possibilities are endless.

And so is the fun!

Ordinary toys tend to bore a child after a while. Because they have discovered nearly all the things they can do with that particular toy. With DUPLO Toys it is different because children keep combining the pieces in an unlimited number of ways. Furthermore the Play Sets get more and more exciting. The rebuildable DUPLO Sea Explorer shown here can float, has a special ramp for cars and trains, and the sailors even float in their lifejackets.

2649

BASIC

BASIC fun. LEGO® BASIC!

At the age of 3 it's time to introduce your child to the magic world of LEGO® BASIC. A unique system stimulating free creative building as well as your child's imagination. Each box contains plenty of bricks that can be combined in millions of ways as the ideas run really free. The LEGO bricks and special pieces fit your child's skills and interest at the recommended age - and since there is nothing that can't be built your child never grows tired of playing with LEGO BASIC Sets.

BASIC

When you're 5 your imagination needs more to work with.

Now your child has already tried to build 3-dimensional things with the LEGO® BASIC Sets. The time has come for more advanced pieces like roofing tiles, shutters, cars with working details etc. Each of these sets contain building instructions for a few models to start things off. This is not a limitation, rather an added experience. And soon you'll discover how your child builds the most incredible things. Perhaps the biggest thrill is to take it all apart, and then start all over again. Using exactly the same LEGO BASIC bricks for a completely new construction.

DON'T FORGET TO USE ALL YOUR OTHER BRICKS!

LEGO BASIC

When you're 7 you begin to understand the grown-up world.

A child of 7 is well aware of the world of grown-ups. LEGO® BASIC Sets for this age group therefore contain more realistic details. And a building guide gives instructions for several fascinating LEGO constructions. Still it's entirely up to the child to follow these instructions - or follow the many winding roads of imagination. When your child eventually chooses one of the other LEGO lines, the new bricks can be build together with the LEGO BASIC Bricks.

LIGHT & SOUND SYSTEM

Even more realism in LEGOLAND® Town and Space.

You have to see and hear it to believe it! For LEGOLAND® Space we introduce a robot and a spaceship, each with flashing lights and "authentic" bip-bip sounds activated by a 9 V battery. (Not included). For LEGOLAND Town you can choose between a police car and a fire engine also with flashing lights and 2-tone sirens. If that choice is too difficult - why not go for both?

Railways

3 ways to get the wheels rolling.

The LEGO® Train is a real playtrain. You actually build it yourself, any way you like it.

The simplest way to power the trains is just by pushing. But any train can be supplemented with a motor either powered by 4.5 volt batteries or a 12 volt transformer via electric rails. Whatever power-system you choose you can lift the roof off the waggons to make new seating arrangements for the passengers or move the freight etc.

LEGO

Technic

A toy so fascinating your dad might want to join the fun!

TECHNIC models work just like things in real life.

Though all the bricks fit with other LEGO® pieces, the Technic range has special pierced girderbeams to hold gear wheels, differentials and working pistons.

For children of 7-9 years it is recommended to start with our Universal Sets which contain instructions for different technical constructions (see next page).

All TECHNIC models can be powered by building a motor in.

Pneumatic power too!

With a miniature airpump connected via rubber hoses to a special valve you can control the different functions of some of the TECHNIC models – just by the press of a finger. Press, press, press...up goes the excavator.
