

A vibrant scene of LEGO bricks and minifigures. In the center, a large red mat features the white 'LEGO' logo with a thick yellow outline. Surrounding the mat are various LEGO elements: a yellow forklift, a blue minifigure, a large red bunny head, a yellow giraffe, a white astronaut, a pirate minifigure, a brown shark, a blue minifigure with a magnifying glass, and various gears and mechanical parts. The background is filled with more colorful bricks and structures.

LEGO

The only toy that's always right - because you made it!

Building fun!

A wide variety of colourful bricks and pieces specially designed for little hands and curious minds.

All ranges stimulate a child's development at every stage encouraging fun and excitement when learning something new. For children between 0-5 years.

SEE PAGES 4-13

It's a new toy every day

The essence of free and creative building.

Gradually the sets contain more and more elements to match the child's increased skills. The Electric System adds fun and play value. For children between 3-16 years.

SEE PAGES 14-40

Remember your first LEGO® bricks as a child? How you made one toy after another – from the very same bricks? Our philosophy is still the same although our range has been broadened considerably. With the DUPLO®, LEGO

and TECHNIC sets there is more than ever before to stimulate your child's imagination. And since everything fits together the excitement just builds on and on!

DUPLO and LEGO Toys can be washed by hand using warm water – max. 40°C (110°F) and washing-up-liquid.
Storage temperature max. 40°C (110°F).
Electrical parts are not washable.

Technic

For advanced LEGO® builders

Technical models with many lifelike elements such as gears and pistons, electric motors, pneumatics and the new Flex System.

The Programmable Control Centre tops the list, and dads can join in too. The official age, however, is 7-16 years.

LEGO**TRAINS**

From 6-12 years

The new 9 volt playtrain doesn't follow the beaten track!

Even the Starter Set can be built into many different trains. And with the 9 volt transformer this playtrain is an integrated part of the LEGO® Electric System shown in this brochure.

Fast Travel – in either direction!

The Transformer and Speed Regulator lets you drive the train at the speed you want.

The new conducting rails connect together with a "snap". Electric pick up is through metallic wheels – simple and reliable.

A notice to all owners of 12 volt LEGO trains:

The introduction of the 9 volt trains doesn't leave you in a siding. For a period of no less than 3 years the LEGO 12 V Train Service Programme provides you with 40 different supplementary and service set units – rails, crossings, points, signals, motors, lights etc. Also your present waggons can be used in connection with the new 9 volt trains.

TECHNIC Universal Pneumatic Set
from 9 years with simple pneumatic pump to power different models.

8854
TECHNIC Salvage Hoist with pneumatic hoist and steering gear. The telescopic arm rotates and is pneumatically raised. Stabilizers and hook work. From 11 years.

Pneumatic control - air power at your fingertips.

1. TECHNIC pneumatic systems work by means of compressed air generated by precision-made airpumps.
2. A special valve controls the airflow. Thus the relevant part of the model moves as compressed air flows in the desired direction.
3. The Digger-and-Dumper demonstrates how realistically the TECHNIC pneumatic system works.

8862
TECHNIC JCB Excavator with steering and 3 pneumatic cylinders that control the backhoe. Has stabilizers and working dumper. From 12 years.

Teach your TECHNIC models all you know!

Imagine your own TECHNIC models controlled by you and an advanced 9 volt Control Centre with dual memories, repeat mode, pause function, a flat control pad – you name it! Two electric motors are included in the set. You can even add a third motor to the colour-coded control terminals.

Programming step-by-step:

1. Press one of the memory-buttons and programme your model by using the flat, control pad. Up to 50 different movements and commands can be stored in the Control Centre's memory.
2. Press the GO-button and watch your model as it carries out exactly the same movements you just programmed it to do. Press twice and the movements are repeated endlessly – until you press STOP!
3. If you want to stop while programming – maybe to change your input – just press a button and give the Control Centre new directions. **You are in charge** – the Control Centre simply carries out your instructions.

Watch the crane while its arm repeats every movement you just told it to do.

The drawing-machine is pure magic – apparently it makes sketches all by itself. But you made the original!

A/B: Controls one motor in either direction.

GO: Press once for single repeat – and twice for endless.

N-S-E-W: Flat control pad to control the model in any direction.

PROGRAM: Press this button when ready for programming.

MEM. I/II: Selects one of 2 memories.

The robot arm can be programmed to grasp a brick, lift it – and gently lower it into one of the two containers. All by itself!
