The best toy designers in the world!

Though we design all the bricks and elements, it takes the imagination of a child to make a truly outstanding toy.

A toy like no other in the world, a toy that can easily be built into a completely different one by spending just a little time.

The DUPLO® Bricks can be built together with the LEGO® SYSTEM sets - which can then work with the LEGO® TECHNIC sets.

That's why LEGO toys have an almost unlimited life and offer so much more value.

LEGO toys can be washed by hand using warm water - max. 40°C (104°F) and washing-up liquid. Storage temperature max. 40°C (104°F). Electrical parts are not washable.

Play Trains

The DUPLO® Play Train goes electric!

The new electric DUPLO® Play Train can run on the track and also directly on the floor. It will fulfil your child's wildest expectations. He can make it run and stop, go backwards and change tracks. And to add to the fun, each of the four functions will respond with its own unique sound. Unlike ordinary toy-trains this one is built by your child and both waggons and locomotive can easily be redesigned.

NEW PLAY TRAIN

3x 1.5 V

My first Electric Play Train will run for about 8 hours on 3 x 1.5 volt batteries. Four different sounds indicate the functions start, stop, reverse and automatic power cut out. (The cut out facility comes into effect when the train has not been activated for two minutes).

The train can be controlled in three different ways: a start/stop button placed on top of the train, a pole reverser which changes the train's direction and by means of a start/stop rail.

NEW

TOOLO

Toys with a new twist!

The special screwdriver with its click function will let your child copy the handiwork of any DIY enthusiast. The screws are permanently attached to the building elements and can't come loose. It's the greatest invention since the DUPLO brick!

1. The sturdy screws can't fall out of the Toolo elements.

2. Loosen the screw turning the screwdriver to the left (unlocking the elements).

3. Connect the elements and tighten the screw turning the screwdriver to the right until it "clicks" (locking the elements).

Add a new dimension to your LEGO TECHNIC models

With the programmable 9 volt Control Centre you are in command!

Use its dual memories, repeat mode, pause function and a flat control pad to program almost any model. Two electric motors are included in the set. You can even add a third motor to the colour-coded control terminals if you wish.

8094
LEGO TECHNIC Control Centre. Contains a programmable control centre, detailed instruction manual, two 9V motors and numerous components to build four exciting, working models. Six 1.5 V batteries (not included in the set) power both the control centre and the electric motors. Use ordinary alkaline batteries size HP7/AA. From 11 years.

Watch the crane while its arm repeats every movement you just tell it to make.

The drawing-machine is pure magic - apparently it makes sketches all by itself. But you made the original!

The robot arm can be programmed to grab a brick, lift it - and gently lower it into one of the two containers. All by itself.
